Work Sheet 2

No. 5510

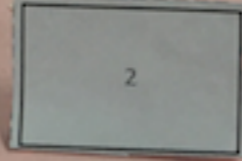

Equations:

Radius  $\times 2 =$  Diameter (  $2R = D$  )

$\pi \times$  Diameter = Circumference (  $\pi D = C$  )

triangle

rectangle

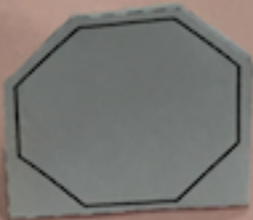

circle

square

star

octagon

oval

diamond

= Circumference  $(\pi D = C)$

radius = Area  $(\pi R^2 = A)$

*then solve the problems:*

$\pi \times \text{Diameter} = \text{Circumference} \quad (\pi D = C)$

$\pi \times \text{Radius} \times \text{Radius} = \text{Area} \quad (\pi R^2 = A)$

*Draw and then solve the problems:*

control  
bench

Teachers  
open the door.  
Let you  
must enter  
by yourself.
