The screenshot shows a game interface with two main panels. The left panel, titled '你猜的數字' (Your guess), contains a list with one item: '1 1245'. A blue arrow points from a text box '第1次猜測的數字' (First guess number) to this item. Below the list is a speech bubble from a cartoon cat saying '請輸入4個不同的數字(輸入完按下enter鍵)' (Please enter 4 different numbers (after entering, press the enter key)). At the bottom of the panel is a plus sign and the text '長度: 1' (Length: 1). The right panel, titled '?A?B', contains a list with one item: '1 0A1B'. A blue arrow points from a text box '第1次猜測的結果 (猜對1個數字，但位置不對)' (First guess result (1 number correct, but position wrong)) to this item. Above the right panel is a '計時器' (Timer) showing '11'. At the bottom right is a yellow button with the text '解答' (Answer). At the very bottom is a long input field with a blue checkmark icon on the right.

The screenshot shows the same game interface as above, but with the second guess. The left panel, titled '你猜的數字', now has two items: '1 1245' and '2 3698'. A green arrow points from a text box '第2次猜測的數字' (Second guess number) to the second item. The speech bubble from the cartoon cat remains. The bottom of the panel shows a plus sign and '長度: 2' (Length: 2). The right panel, titled '?A?B', now has two items: '1 0A1B' and '2 0A2B'. A green arrow points from a text box '第2次猜測的結果 (猜對2個數字，但位置不對)' (Second guess result (2 numbers correct, but position wrong)) to the second item. The '計時器' (Timer) now shows '23'. The yellow '解答' (Answer) button and the bottom input field are still present.
