(47~50)

Do you think that people usually eat ice cream on hot summer days? Things may have changed. The weather is still freezing cold, but people on the streets are enjoying their ice cream! It's the magic of *soft serve*, a type of ice cream that is softer than regular ice cream.

Eating soft serve has been a big hit in Taiwan for some reasons. As we know, people used to buy soft serve at an ice cream shop or in a fast food restaurant. Now, everyone can get one even at a convenience store. That is to say, we can enjoy soft serve anytime and anywhere.

Another reason is that in the past, soft serve always came in flavors such as vanilla and chocolate. But now, we have more choices. Strawberry or even mango flavors are waiting for you to choose from. This is why we may see lots of people waiting in lines at a convenience store in order to buy soft serve.

Things that people can't easily get are better! Some convenience stores limit the offer of strawberry soft serve so that not everyone can buy one. When they really get the soft serve, instead of eating it right away, they take photos and post them onto facebook to tell their friends that they are enjoying the special soft serve. Eating soft serve has become a way of showing off!

No matter you buy soft serve for what reason, remember not to eat too much. The high calories of soft serve will make you fat!
