DR. EYE

**GIVE YOUR CHILDREN A WONDERFUL
FUTURE WITH DR. EYE**

Do your children rub their eyes often when they study? If so, your children may have an eye problem --nearsightedness. About half of the elementary school students in Taiwan have nearsightedness. When they go to junior high school, the number is over 70%. What makes our young students get nearsightedness so easily? Some doctors made a study of over 300 junior high school students, and the figure here can give you the answer.

Causes of nearsightedness	Boys(100%)	Girls(100%)
Watching TV	50(32.9%)	72(40.9%)
Using computers	48(31.6%)	42(23.9%)
Reading	42(27.6%)	48(27.3%)
Others	12(7.9%)	14(7.9%)

So, if your children have to study at their desks and use their eyes for a long time, having a good light on the desk is a very good way to stop them from getting nearsighted.
