There are fortune-tellers in many countries. The fortune-tellers of Gypsy can see one's future in a crystal ball. In some countries, fortune-tellers can read a person's palm and tell him many things about his future. They are called palm readers. There are many lines across and down the palm. A palm reader can tell a person when he will marry, how long he will live, and many other things by reading the lines. Some fortune-tellers can read tarot cards and tell people about their futures. They look at the magical cards and tell a lot about people's future lives. Many Chinese can read I Ching to find out people's futures. A person asks a question first, throws some coins and watches how they fall. Then the fortune-teller uses I Ching to find out the meanings of the coins.

It's common that we are curious about our futures. We may go to a fortune-teller to get some comfort when feeling down. However, we should always remember that hard work brings success.
